over
\$4,000

We take a lot of enquiries from customers asking for advice on new vs used cars. Used car prices are inflated in the current market due to new car availability.

Sharna was referred to us as she had been given a quote for a 4 year old Hyundai i30 with finance payments.

After working through our dealer network, we were able to get her into a NEW car and saved her over \$4,000. We also coordinated the finance which was \$11,000 less in interest.

If you are looking at a late model used car please get in touch to find out what we can do on a new car. You might be surprised like Sharna.
